

Management and Service Support Services

In our experience as managers of teams of Educators and as training professionals, we have been asked many times for strategies and advice to solve certain issues, be the objective eyes and work with teams to reflect on and improve their practices.

As a result, we have developed strategies with teams of Educators to encourage new skills and create tools that are individualised for the client we are working with. Collaboration is an important tool for us to build solutions for our clients. We have also worked with clients to implement these strategies to coach management teams so they can go forward with confidence and build their own solutions.

We have also worked with managers to identify those strong team members who have a desire and skill to be great coaches within an Early Childhood team to support and development the growth of learning and professionalism within the service. We have then continued to work with these key team members to continue to build their skills and to bring groups of coaches together so they can share new ideas and concepts.

We believe that the support and leadership of management is fundamental in guiding quality teams of Educators that are motivated and inspired to work towards common goals.

We have a proven track record when supporting Managers and Management Teams with the following:

- Professional induction and reflection programs
- Training needs analysis
- Performance appraisals and previews
- Staff management and guidance
- Service reviews
- Team building
- Pedagogical leadership and coaching

We would be happy to discuss your ideas and construct a individualised plan and quote.
