

Professional Development and In-service Training

We pride ourselves on the strong relationships we build with our clients. We take the time to understand your profile, staff and training needs, beliefs and goals.

We construct and plan all training sessions with you as we believe that personalising sessions is the best way for teams to learn together and improve practices. When we have the opportunity to work alongside Educators, we see learning translating into sound reflective practice.

Working within your curriculum or program, we will come to you at a time that is best for you. Timing is flexible but a minimum of 2 hours is usually best to explore a topic as a workshop.

We have also developed a facilitated discussion option to explore a topic within a group of Educators which is a less formal but suitable for a reflective practice style approach.

We strive to meet your specific training needs and our experiences enable us to explore a broad range of topics with Educators:

- Play environment design,
- Pedagogical leadership,
- Art of observation and learning story development,
- Relationships with families,
- Team building,
- Nutrition and food safety,
- Professionalism in Early Childhood Education,
- The environment and its impact on spirited behaviour,
- Engaging play spaces,
- Working alongside babies,
- Use of natural and recyclable materials

We are also happy to investigate further topics and ideas with you.
